

Amenity	Definition
<i>Employment</i>	Measures the closeness of a dissemination block to any dissemination block with a source of employment within a driving distance of 10 km. This measure is derived from the employment counts of all businesses – that is, all North American Industry Classification (NAICS) codes in the Business Register.
<i>Grocery</i>	Measures the closeness of a dissemination block to any dissemination block with a grocery store within a walking distance of 1 km. This measure is derived from the total revenue of all NAICS 4451 businesses in the Business Register.
<i>Pharmacy</i>	Measures the closeness of a dissemination block to any dissemination block with a pharmacy or a drug store within a walking distance of 1 km. This measure is derived from the presence of all NAICS 446110 businesses in the Business Register.
<i>Health care</i>	Measures the closeness of a dissemination block to any dissemination block with a health care facility within a driving distance of 3 km. This measure is derived from the employment counts of all NAICS 6211, 6212, 6213, 621494, and 622 businesses in the Business Register.
<i>Child care</i>	Measures the closeness of a dissemination block to any dissemination block with a child care facility within a walking distance of 1.5 km. This measure is derived from the presence of all NAICS 624410 businesses in the Business Register.
<i>Primary Education</i>	Measures the proximity to primary education measures the closeness of a dissemination block to any dissemination block with a primary school within a walking distance of 1.5 km. Primary schools are classified as education facilities with an International Standard Classification of education (ISCED) level of 1. The data source is a conglomeration of the Open Database of Education Facilities and other sources of education facilities.
<i>Secondary Education</i>	Measures the closeness of a dissemination block to any dissemination block with a secondary school within a walking distance of 1.5 km. The data source is a conglomeration of the Open Database of Education Facilities and other sources of education facilities where secondary schools are classified as ISCED2 and/or ISCED3.
<i>Transit</i>	Measures the closeness of a dissemination block to any source of public transportation within a 1 km walking distance. This measure is derived from the number of all trips between 7:00 a.m. - 10:00 a.m. from a conglomeration of General Transit Feed Specification (GTFS) data sources.
<i>Parks</i>	Measures the closeness of a dissemination block to any dissemination block with a neighborhood park within a 1 km walking distance. This measure is derived from the presence of all parks from a conglomeration of authoritative open data sources and OpenStreetMap.
<i>Libraries</i>	Measures the closeness of a dissemination block to any dissemination block with a library within a 1.5 km walking distance. This measure is derived from the presence of all libraries from a conglomeration of open and publicly available data sources.
<i>Amenity Dense</i>	An aggregate measure was created to indicate neighbourhoods that have access to basic needs for a family with minors. A dissemination block with access to a grocery store, pharmacy, health care facility, child care facility, primary school, library, public transit stop, and source of employment is referred to as an amenity dense neighbourhood. A high amenity density neighbourhood is defined as an amenity dense neighbourhood that has proximity measure values in the top third of the distribution for each of the eight proximity measures.
